APPLIANCE SAFETY

If you are hiring one of our holiday homes then you may find some of the following information useful.

Please note that the contents of equipment in our holiday homes vary according to grade.

Holiday Home Security - Please remember when you go out to shut all windows and doors. This is especially important if you are in a holiday home with an alarm, as this may set the alarm off. As windows are used as a means of escape, there are no safety catches.

Microwaves - These operate as domestic microwaves. Please do not place metal objects or aluminium foil inside the microwave.

Carbon Monoxide/Smoke Detector - If this beeps then please inform reception so we can then change the battery. Should they activate, evacuate and inform reception.

Fridges - Please do not set the thermostat too high. When the fridge is full it takes time to cool down. A setting of 3 or 4 should be sufficient.

When you leave, please turn off the fridge and open the fridge door, so it will be ready for the next guest.

Electrical Equipment - All electrical appliances in your holiday home have been safety checked.

Guests use their own electrical equipment at their own risk. Please do not overload electrical sockets and switch off equipment when not in use.

External Doors - Do not rely on the use of the door retainer in windy conditions.

Ventilation - Never cover any floor or ceiling vents under any circumstance.
